# Improve your profit

The success of your business depends on the reliability and efficiency of your construction machinery. With Hitachi Zaxis-7 super long front excavators, you can count on the highest quality, the ultimate in operating comfort and reduced running costs – all of which will have a positive impact on your bottom line.

You can look forward to increasing your profits thanks to the impressive fuel economy of these Stage-V compliant machines. They deliver up to 11% less fuel consumption than previous models.

Hitachi's industry-leading hydraulic system, the new TRIAS III, ensures that this incredible level of performance is achieved in every application. Its superior efficiency excels on dredging, grading, loading or deep digging operations.

Your operators can also control fuel efficiency – and reduce costs – by using the all-new ECO gauge. This is clearly visible on the multifunctional colour LCD eight-inch monitor.

In addition, you can boost your profits by working on a wider range of projects thanks to their excellent versatility. Different attachments and buckets are quickly changed using the enhanced attachment support system on the monitor. Assist piping on the boom and arm enables the tilt and rotation of buckets. Your operators can also expect enhanced manoeuvrability on different types of terrain.

The pilot pressure of the main control valve is set to a lower level than standard excavators, resulting in reduced oil flow and hydraulic speed of swing and boom movements, and enhancing controllability of the boom and arm.

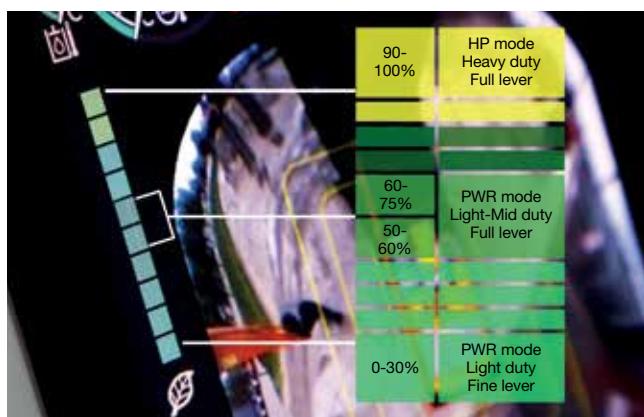

The super long front machines are also easy to move from one job site to another as they have been designed for optimal transport height and stability during transit.

A fuel saving of up to 11% is achieved with the TRIAS III hydraulic system.

Long or narrow undercarriage options suit various working conditions.

The ECO gauge helps to deliver better fuel consumption.

Optimal transport height and stability during transit.

You're in control with a spacious, tidy and enjoyable working environment.

The cab has ample space for your belongings.

The LCD monitor is easy to view with hi-res anti-glare screen.

# Feel the difference

Hitachi's redesigned, state-of-the-art Zaxis-7 excavator cab gives you the perfect working environment. Ultra-spacious, it is industry-leading and offers the ultimate in comfort and quality, as well as the lowest noise levels in the market and up to 27% less vibration than the previous generation.

Feel the difference with the synchronised motion of the seat and console, designed to ensure you feel less tired at the end of the working day. Stretch out in the most spacious Hitachi cab yet, with improved pedal layout, ample head clearance and legroom. And sit comfortably thanks to the easily adjustable console height with three positions to choose from.

Easy operation comes from the new ergonomic design of the console and switches, and convenient access to controls. You can navigate quickly through the menu on the 8" LCD monitor with the multifunctional controller. The hi-res anti-glare screen is also easier to view, and the refreshed layout offers a clear display and desirable functionality – such as air conditioning, DAB+ radio and Bluetooth®.

With more storage for your personal belongings, such as your coat, smartphone and drink, you'll feel instantly relaxed and ready for your shift. Added practical functions to the joysticks, such as wiper, engine idle and audio mute controls, will make your working day effortless and enjoyable.

Ergonomic multifunctional control panel provides easy access.

# Increase your safety

Your ability to work safely is vital, not only for your own wellbeing, but also for the successful completion of any project. To protect yourself and your machine from potential hazards, the new Hitachi Zaxis-7 super long front excavators give you a superior view of your surroundings, so you can see the job site from all angles.

The visibility you enjoy from the cab includes an exceptional 270-degree bird's-eye view with the Aerial Angle® camera system. You can choose from six image options to view the machine's immediate environment, which enables you to control your own safety – as well as that of those around you.

To help you to work more confidently and efficiently, even in the most challenging of conditions, Zaxis-7 super long front excavators are fitted with some impressive new features, including LED work lights.

The stability of the machine is enhanced by the counterweight system, which balances the additional load of the super long front equipment. It offsets dynamic forces, adjusting the centre of gravity, enhancing safety and performance.

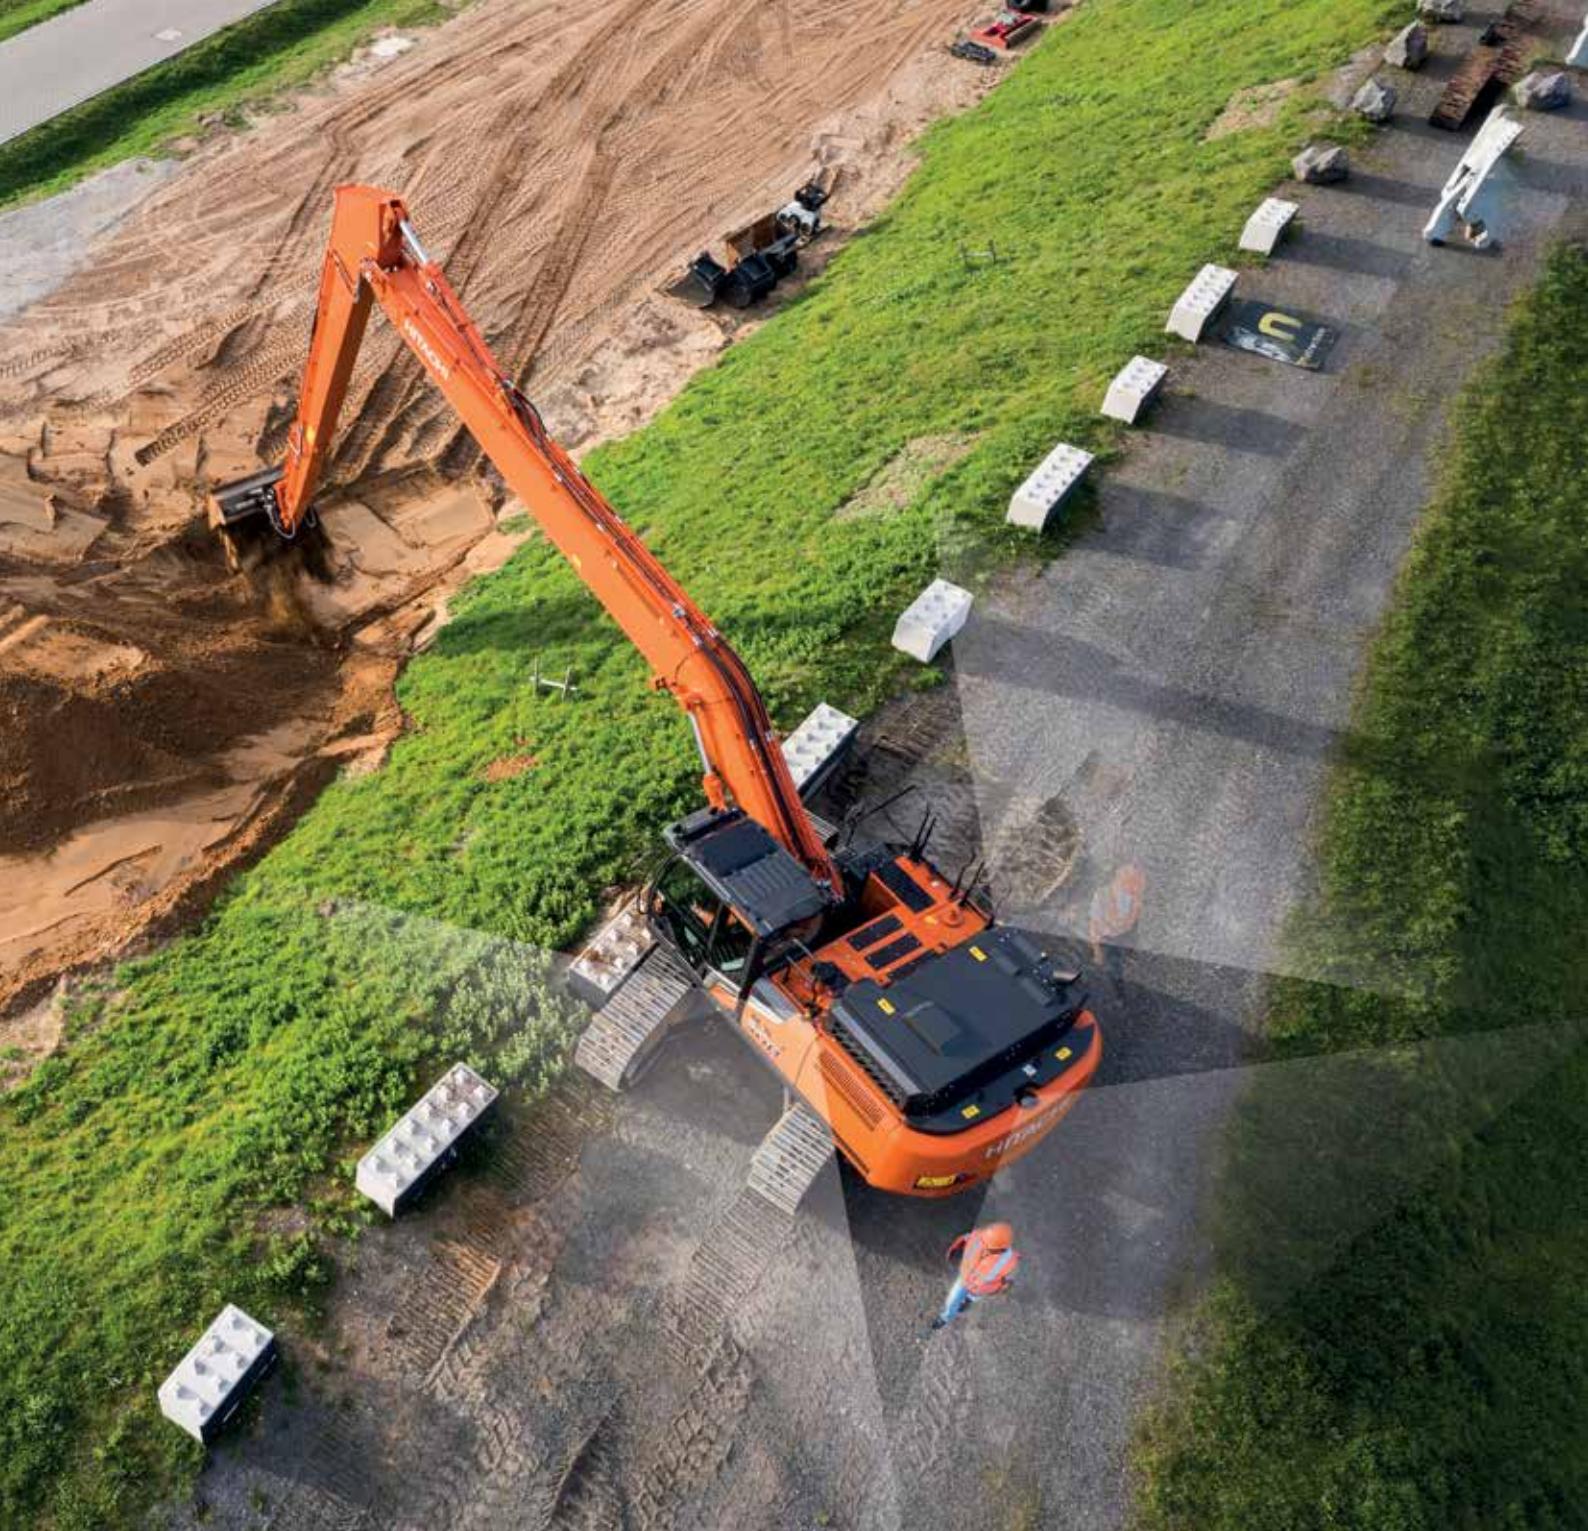

Another important safety feature is the hose rupture valve. If it detects rapid loss of hydraulic oil pressure, it quickly closes the hydraulic cylinder to ensure operator safety and minimal damage to your equipment.

The pilot shutoff lever offers enhanced safety in the cab.

Hose rupture valve protects personnel and equipment.

Control your safety with the 270-degree view Aerial Angle® camera system.

Choose between different image layouts to suit your working environment.

LED work lights improve visibility in challenging conditions.

Durable after-treatment system prevents downtime.

The centralised greasing point combines all five points in one for easy maintenance.

Maintenance is easy at ground level.

Engine cover enables convenient access for daily inspections.

Designed for durability and easy maintenance, Zaxis-7 excavators increase uptime and reduce the total cost of ownership.

In control of your assets

# Boost your uptime

Completing a project on time and on budget depends on the ability of your construction equipment to perform all day, every day. That's why Hitachi owners have profited from generations of ultra-reliable and durable machinery – and the Zaxis-7 range is no exception.

The latest Hitachi super long front excavators have been built to last, so that you can remain in complete control of your assets. They have been tested rigorously and continuously at dedicated facilities in Japan with the goal of significantly boosting your uptime.

As a result, a wide range of durable new components have been fitted to the latest Stage-V compliant machines. In addition, most parts are interchangeable with standard Hitachi machines, which facilitates easy maintenance and ensures maximum availability.

Downtime is also minimised by the priority given to easy maintenance and cleaning – with wide door and cover openings providing convenient access – saving you time and money.

In control of your fleet

# Manage your machine

Hitachi offers a wide range of after-sales services to help you feel in total control of your fleet and workload. These initiatives give you access to vital data and tools to manage your machine.

Remote monitoring systems Owner's Site and ConSite send operational data daily via GPRS or satellite from your excavator to [www.globaleservice.com](http://www.globaleservice.com). This includes: ratios of operating hours to enhance efficiency; fuel consumption to manage running costs; and machine location for planning purposes. ConSite summarises the information in a monthly email.

The ConSite Pocket App sends you real-time alerts for issues arising with your machine. You'll receive recommendations on what to do and step-by-step help guides. The app also enables you to see the location of your fleet.

A unique innovation continuously monitors the quality of engine and hydraulic oil, 24/7. Data is transmitted daily via two oil sensors to Global e-Service. These detect if the oil quality has deteriorated, due to contamination or low viscosity. If this happens, you and your authorised Hitachi dealer will receive an alert.

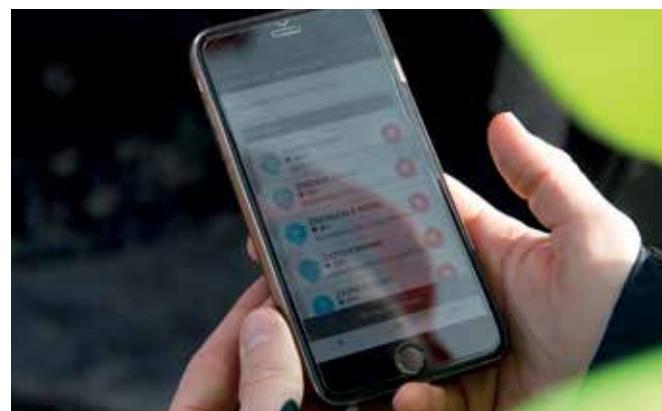

This innovative feature provides accurate estimations of when oil changes are required. It reduces maintenance and unscheduled downtime, and gives you peace of mind thanks to scheduled servicing and ultimately a higher resale value.

# Protect your investment

If your machine will be working in severe conditions, or you want to minimise repair costs, you can take advantage of a unique extended warranty programme called HELP (Hitachi Extended Life Program) and comprehensive service contracts. These can help to optimise performance, reduce downtime and ensure a higher resale value.

We apply the same technological expertise to our wide range of high-quality parts as we do our machines. As a result, you can minimise unscheduled downtime and ensure maximum availability.

The parts range includes Hitachi Genuine Parts, Performance Parts, filters, undercarriages, and remanufactured components. We also offer ground engaging tools and buckets, which have been manufactured to the same exacting standards.

As your business grows, you may need to extend your fleet to meet the demands of new contracts. Why not try before you buy with the Hitachi Premium Rental programme? This gives you immediate access to Zaxis-7 super long front excavators for a period of one month to a year.

Along with the reliability, quality and service you would expect from the Hitachi brand, Hitachi Premium Rental offers flexible contracts and fixed costs that make it easier for you to budget.

## Metric measure

Notes: 1. Ratings are based on ISO 10567.

2. Lifting capacity of the ZAXIS series does not exceed 75% of tipping load with the machine on firm, level ground or 87% full hydraulic capacity.
3. The load point is the center-line of the bucket pivot mounting pin on the arm.
4. \* Indicates load limited by hydraulic capacity.
5. 0m = Ground.

For lifting capacities, subtract bucket and quick hitch weight from lifting capacities.

# LIFTING CAPACITIES

## Metric measure

Notes: 1. Ratings are based on ISO 10567.

2. Lifting capacity of the ZAXIS series does not exceed 75% of tipping load with the machine on firm, level ground or 87% full hydraulic capacity.
3. The load point is the center-line of the bucket pivot mounting pin on the arm.
4. \* Indicates load limited by hydraulic capacity.
5. 0m = Ground.

For lifting capacities, subtract bucket and quick hitch weight from lifting capacities.

A: Load radius  
B: Load point height  
C: Lifting capacity

# LIFTING CAPACITIES

ZX300LC / ZX300LCN

## Metric measure

Notes: 1. Ratings are based on ISO 10567.

2. Lifting capacity of the ZAXIS series does not exceed 75% of tipping load with the machine on firm, level ground or 87% full hydraulic capacity.
3. The load point is the center-line of the bucket pivot mounting pin on the arm.
4. \* Indicates load limited by hydraulic capacity.
5. 0m = Ground.

For lifting capacities, subtract bucket and quick hitch weight from lifting capacities.

A: Load radius  
B: Load point height  
C: Lifting capacity

# LIFTING CAPACITIES

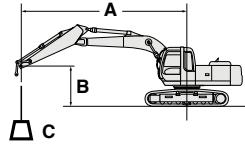

ZX300LC / ZX300LCN

## Metric measure

Notes: 1. Ratings are based on ISO 10567.

2. Lifting capacity of the ZAXIS series does not exceed 75% of tipping load with the machine on firm, level ground or 87% full hydraulic capacity.
3. The load point is the center-line of the bucket pivot mounting pin on the arm.
4. \* Indicates load limited by hydraulic capacity.
5. 0m = Ground.

For lifting capacities, subtract bucket and quick hitch weight from lifting capacities.

A: Load radius  
B: Load point height  
C: Lifting capacity

# LIFTING CAPACITIES

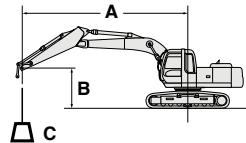

ZX350LC / ZX350LCN

## Metric measure

Notes: 1. Ratings are based on ISO 10567.

2. Lifting capacity of the ZAXIS series does not exceed 75% of tipping load with the machine on firm, level ground or 87% full hydraulic capacity.
3. The load point is the center-line of the bucket pivot mounting pin on the arm.
4. \* Indicates load limited by hydraulic capacity.
5. 0m = Ground.

For lifting capacities, subtract bucket and quick hitch weight from lifting capacities.

A: Load radius  
B: Load point height  
C: Lifting capacity

Notes: 1. Ratings are based on ISO 10567.

2. Lifting capacity of the ZAXIS series does not exceed 75% of tipping load with the machine on firm, level ground or 87% full hydraulic capacity.
3. The load point is the center-line of the bucket pivot mounting pin on the arm.
4. \* Indicates load limited by hydraulic capacity.
5. 0m = Ground.

For lifting capacities, subtract bucket and quick hitch weight from lifting capacities.

# LIFTING CAPACITIES

ZX490LCH HE16LD

## Metric measure

Notes: 1. Ratings are based on ISO 10567.

2. Lifting capacity of the ZAXIS series does not exceed 75% of tipping load with the machine on firm, level ground or 87% full hydraulic capacity.
3. The load point is the center-line of the bucket pivot mounting pin on the arm.
4. \* Indicates load limited by hydraulic capacity.
5. 0m = Ground.

For lifting capacities, subtract bucket and quick hitch weight from lifting capacities.

A: Load radius  
B: Load point height  
C: Lifting capacity
